

## Easy-to-use Interface

No special training is required to operate the controller system. The main parameters of one/multi-WU\N networks is available on the dashboard. Simple design would also help to easily realize the real-time status monitoring and customized

## One minute network configuration

Using the intelligent centrally management between Ac and AP can quickly synchronize wireless configuration into each AP to complete a unified construction of the wireless network configurations.

## Product Parameters

Type	Indoor
CPU	IPQ5018
Size of RAM	256MB
FLASH	16MB
802.11b/g/n	√
802.11b/g/n/ac/ax	√
Wireless 2.4 GHz Max data rate	574Mbps
Wireless 5GHz Max data rate	2402Mbps
Tx power	23dBm
Antenna	2*3dBi
Ethernet	1 Gbps
Max power consumption	9W
POE IN	802.3af/at
Ceiling Mount	√
Size	198*198*39.5mm
Weight	0.5kg
Tested ambient temperature	-40°C to 70°C
Certification	CE, FCC, ROHS
