

Product Overview

The I 20117467 PoE Splitters will work with any Power Sourcing Equipment (PSE) that also supports the 802.3at/bt standards.

PoE (Power over Ethernet) technology allows the existing Ethernet infrastructure to transmit electrical power, along with data, to remote IP endpoints over the Ethernet cables, which can greatly save the cost of the external power cables. Your network can benefit from PoE technology for it will ensure the normal working status of your network while keep the existing Ethernet infrastructure secure.
