

The KONEXX Model 100 Connector interfaces between your telephone and a recording device, allowing the recording of both sides of a telephone conversation at equal levels.

KONEXX® Model 100

With the KONEXX Model 100 Connector, you can connect an analog recording device directly to any telephone with a modular handset jack. The KONEXX Model 100 interfaces simply between the handset port on the telephone unit base and the recorder, allowing two sides of a phone conversation to be recorded at equal levels.

The compact Model 100 is compatible with all recording devices (including voice activated devices). There is no need to disconnect the Model 100 when you

are not recording, simply take the recorder out of record mode.

The KONEXX product line is manufactured in the U.S. by KONEXX, a supplier of award-winning Computer Telephony Interface products for over 15 years. In addition to highly qualified technical support, This KONEXX product carries a 90-Day factory warranty and a 30 day money-back guarantee. Document your important phone conversations—get connected with the versatile KONEXX Model 100 Connector.
